Remarks

Applicant appreciates the observations of Examiner during prosecution of this application.

5

In response to objections regarding Claim 2, Applicant has divided it up into two (2) claims: Claim 2 and new Claim 11. These specify the machine guns to which Applicant's invention particularly pertains, although it is adaptable to other machine guns.

10

In response to objections regarding Claim 8, Applicant has removed all language as to the degree of speed involved in the operation of the invention.

Should the language of Claims 2, 8, and or 9 not meet with Examiner's approval, Applicant's Agent requests Examiner to call with suggested claim language.

15

Every effort has been made to constructively amend each area of the claims and specification in accordance with all of the examiner's observations in the above-referenced Office Action. Accordingly, applicant respectfully requests a timely Allowance in this case.

20

Respectfully Submitted,

25

Michael A. Shippey, Ph.D.
